

# **ATM** PT ASIA TALENTA MANDIRI

## *Metal Working Chemical Specialist*

PT Asia Talenta Mandiri more than a decade as professional industrial supplier for lubricant and grease. Was founded in December 17th, 1999. PT Asia Talenta Mandiri have been specialized in metal working industry and stock up multiple product range line up with after sales services to support the customer expectation.

Distributor Of:

### NIPPON GREASE

#### **Nippon Grease Products :**

Industrial Grease  
Rust Preventive Oil  
Heat Cutting Oil  
Water Soluble & Grinding Coolant  
Press & Punching Oil  
Quenching Oil

### LIKAN

#### **Likan Products :**

Washing Agent  
Machining Agent  
Water Base Anti Rust Agent  
Polishing Agent  
Cooling Tower Chemicals  
WWT Chemical  
Floor Clean Agent  
Rust Remover Agent

### PALACE CHEMICAL

#### **Fumio Lube Products :**

Industrial Grease  
Hydrocarbon Cleaner  
Quenching Oil  
Maintenance Oil

#### **Palace Chemical Products :**

Punching Oil (Easy Dry)  
Punching Oil (Oil Type)  
Special Oil

### PRIMA POLYTECH

#### **Prima Polytech Product :**

Forging Oil

#### **Musashi Techno Chemical :**

Hydrocarbon Cleaner

### BANSEI

#### **Bansei Product :**

Carbon Killer

# FUMIO LUBE : HYDRAULIC OIL

## APPLICATION AND DESCRIPTION

- ☐ Preferred oil for high speed and high pressure pumps requiring anti-wear properties.
- ☐ Premium anti-wear hydraulic fluid for industrial applications, such as off-road machine, marine, mineral machine, moving machine, agriculture machine, plastic injection machine.
- ☐ Formulated with premium quality grade II base oils, rust and oxidation inhibitors, antifoam additive, an effective anti-wear additive, and a demulsifier.
- ☐ Industrial & Mobile applications for vane and piston pumps under standard or severe operations of 140 kg/cm<sup>2</sup> to 210 kg/cm<sup>2</sup>.
- ☐ Suitable for machine tool lubrications.

## OUR PRODUCTS :

Products Name	Color ASTM	Density@20 °C Kg/L	Viscosity@40 °C cSt	Viscosity@100 °C cSt	Application
FL Hydro 2	L 0.5	0,811	2	1	High speed Spindle oil
FL Hydro 5	L 0.5	0,836	5	1,5	High speed Spindle oil
FL Hydro 10	L 0.5	0,85	10	2,6	High speed Spindle oil
FL Hydro AW 32	L 0.5	0,858	32	5,6	Hydroulic oil low viscosity
FL Hydro AW 46	L 0.5	0,856	46	7	Hydroulic oil medium viscosity
FL Hydro AW 68	L 0.5	0,871	68	8,5	Hydroulic oil, mechanic oil
FL Hydro AW 100	L1.0	0,884	101	11	Hydroulic oil, mechanic oil, gear oil.
FL Hydrofluid G 46 ( Synthetic Water Polymer Type)	Red	1,08	44,5	.	Hydroulic water glycol base.

## Lubricating Greases

Greases for instrument and equipment, which realizes a longer operating life and maintenance free, are not merely used for lubrication of automobiles and industrial/construction machinery, but it serves now as important as an indispensable part for each precision instrument applied on.

Use : For lubrication of automobile/vehicle, various kind of bearing industrial/construction machinery, rolling mill, etc.

## Rust Preventive Oils

Rust preventive oils are used as surface protection for metals, parts, and products, in order not to rust. Selecting proper rust preventive oil for any purpose and application, and complete rust prevention control enable you not only to enhance product quality, but also to reduce unnecessary loss and cost

Use : Finishing rustproofing, long/medium/short-term rustproofing, temporary rust proofing between processes, lubricative rustproofing, removing fingerprints, etc.

## Heat Treating Oils

Heat treating oils are designed to meet the mechanical performance requirements needed to produce high-quality metallic materials, when heating and cooling these materials under special condition. These are normally mineral oil-based, used in quenching and tempering.

Use : Hot bath quenching, bright quenching, vacuum carburizing and quenching, induction hardening, etc

**LIKAN CO.,LTD.**

Washing Machines Product

**Powder Type**

### Polishing Agents : FC Compound

Likan FC Compound are polishing chemicals for steel, copper and aluminium, display an effect of degreasing and deburrry

**BEFORE**

**AFTER**

**Liquid Type**

### FEATURES :

- Used for cleaning, deburring and making glossy.
- Prevent rust or corrosion of parts during finishing and separating operation.
- Reduce the time of barrel to increase the production quality.

**BEFORE**

**AFTER**

**PALACE CHEMICAL CO., Ltd.**

## PUNCHING OIL

株式会社 武蔵テクノケミカル  
Musashi Techno Chemical Co., Ltd.

## HYDROCARBON CLEANER :

**Degreasing detergent MD series MD-100 MD-200 is a degreasing detergent composed of a single substance with normal paraffin of 99% or more.**

**It has high mutual solubility with oil processing oil and excellent detergency. It has a very narrow boiling range and is excellent in dryness and distillation regeneration.**

**Normal paraffin has excellent thermal stability and oxidation deterioration resistance. Therefore, it is resistant to repeated**

**distillation regeneration, realizes low running cost, and is also a gentle cleaner for materials that are less concerned about metal corrosion.**

### FEATURES :

**Oil degreasing cleaning, water-soluble degreasing cleaning, abrasive removal etc  
. of various metal parts such as press working, cutting processing, drawing processing**

BANSEI CHEMICAL  
HEAVY INDUSTRY.,LTD

## PREVENT CARBURIZING AGENTS

▶ Water solubility Prevent carburizing agent (Carbon-Killer No.3)

▶ Prevent carburizing agent (Carbon-Killer No.2(solvent type))

▶ Water solubility Prevent carburizing agent (Carbon-Killer No.4)

# LUBE FORGE

**HOT/WARM FORGING, COLD FORGING  
& EXTRUSION LUBRICANT**

**Prima Polytech Co., Ltd. emphasized on manufacturing high quality product with advance technology and Machinery**

- . Our Capacity of over 8,000 metric tons per annual to cover all of our customers requirements & future expansion of their businesses.**
- . Our technical term are working closely with our clients & suppliers are partners to research & development new products.**

**LUBE FORGE products are water-based/oil-based graphite lubricants and water-based/oil based non-graphite lubricants which very useful product for tough forgings. These forging lubricants are invented for improving die life and surface finish. The non-graphite lubricants are nonpolluting, and have no heavy metal products.**

**Forging Lubricant - Graphite Type  
- Lube Forge 130 Series**

**Forging Lubricant - Non Graphite Type  
- Lube Forge 200 Series**
