

WEILIANG SIEVING MACHINERY CO, LTD

SPECIALIZED IN FINE SCREENING

EMPHASIZED IN QUALITY, VALUE & SERVICES

- **ABOUT US**
- **VISION & MISSION**
- **SUBSIDIARY COMPANIES**
- **NEW FACILITY**
- **MAIN PRODUCTS**
- **HIGHLIGHTS**
- **INNOVATIONS & AWARDS**
- **OUR CUSTOMERS**

《ABOUT US》

WEILIANG Sieving Machinery Co., Ltd is **a leading manufacturer of vibrating screen and sieving equipment in China**. It was founded in 2006, and has since developed to become the leader in fine screening industry. It has three subsidiaries and about 200 full time employees. Its factory and offices cover a total work area of 60,000 square meter, equipped with advanced manufacturing equipment

《OUR VISION》

To be the world leader in particle separation and customers' preferred screening brand. WEILIANG not only gain recognition from its products' value and quality, but also from its overall service in **providing screening solutions to customers**. In 20 years, WEILIANG will become world's renowned brand. Its innovation and quality will be recognized worldwide and be proud of.

《OUR MISSION》

WEILIANG strives to be the leader in the field of fine screening that others in domestic market will try to benchmark with. WEILIANG is committed to R&D, to applying continuous improvement in its manufacturing process, bringing the best value products to satisfy its customers needs.

《SUBSIDIARY COMPANIES》

- 2018
- **WEIDE Screening Technology Co. Ltd**
- Specialized in R&D and production of Gyratory Screen

- 2023
- **WEIER Mining Machinery Equipment Co. Ltd**
- Specialized in turnkey crushing, grinding & screening project

- 2023
- **WEILIANG Singapore Pte Ltd**
- Regional office in Singapore, focused in sales and aftersales support

《NEW FACILITY》

- Newly erected manufacturing facility, **39,979m²** of area
- Highly automated production lines
- Highly digitalized Smart Factory

《MAIN PRODUCTS》

S49 ROUND VIBRATING SCREEN

- Classic round vibrating screen for Scalping, Sizing, and Solid-liquid separation
- Good for high precision, small batch screening
- Easy adjustment of vibration amplitude and screening retention time
- Easy change of screen, long service life and low maintenance
- Up to 4 decks (5 different size classifications)
- Available sizes are 0.6m, 0.8m, 1.0m, 1.2m and 1.5m diameter.

S49-AC ULTRASONIC VIBRATING SCREEN

- Ultrasonic wave generated on screen to prevent blinding or clogging
- Usually required for very fine powder and hard to screen material
- WEILIANG successfully developed resonator ring that enables 20% increase in wave power, hence higher screening rate

S49-AQ FLOW-THROUGH VIBRATING SCREEN

- Normally used for removing of lumps, impurities, and as a safety screen
- High throughput, easily fit into production line with low head room
- One motor or two motors configurations.
- Food grade and GMP standard available
- Maintenance free and long service life

YBS TUMBLER SCREEN

- Classify bulk dry materials in large volume yet achieve high accuracy
- Adjustable of round sifting motion to achieve high screening efficiency of fine and ultra-fine particles
- Up to 5 decks, 6 different classifications
- Available diameters from 1m up to 2.9m.
- Pneumatic deck lifting system available for easy change of screens.

WLQ CENTRIFUGAL SCREEN

- Good for Scalping, De-dusting and De-agglomerating of bulk solids and powder
- Screen cage rotating in high speed generates centrifugal force for high throughput
- Compact in size, dust free enclosure and hygienic.
- Screen cage media available in Nylon or Stainless Steel
- Screen cage can be checked and replaced easily.

FYBS GYRATORY SCREEN

- Classification of bulk dry materials in large volume.
- Up to 5 decks, 6 different sizes of separations
- Parallel feed design available to double the capacity in one machine
- Easy installation and easy operation
- Low maintenance and low cost of screen replacement

SZF LINEAR VIBRATING SCREEN

- Linear motion vibrating screen, able to classify and convey at the same time
- Good in handling large volume for scalping purpose
- Simple structure, free maintenance and durable
- Cost effective for simple screening

GLS PROBABILITY VIBRATING SCREEN

- Mainly used in coarse particle classification. Quick discharge and large capacity.
- Adjustable vibration amplitude, frequency and inclined angle for better efficiency.
- Fully enclosed, dust- free, environmental friendly.
- Easy screen replacement
- Able to separate up to 5 different sizes

WLT RECTANGULAR WET SCREEN

- Handle high volume of solid-liquid separation
- Good for dewatering or removing of impurities from slurries
- Multi-motion, able to toggle between linear and elliptical motion instantly.
- Easy change of screen
- Various mesh size available, up to 325 mesh (45 micron opening)

《HIGHLIGHTS》

- **FIRST** company to manufacture Tumbler Screen in China - over 3500 units installed
- **FIRST** company to manufacture Rectangular Screen in China - over 1000 units installed
- Partner with renowned suppliers such as Italvibras, ABB, SIEMENS, SKF, FAG, Dow Corning to offer quality products
- Invested heavily in advanced manufacturing equipment such as KUKA robot welding system, laser cutting and bending equipment from Trump Germany, CNC machines, 3000 tons hydraulic press, etc.

《INNOVATIONS & AWARDS》

- WEILIANG sets the industry standard for all companies to follow in producing **Centrifugal Screen Q/XWL-01-2012** and **Tumbler Screen Q/XWL-02-2015**.
- Awarded "China's Top Ten Quality Brand" in vibrating screen industry
- Awarded "China A-class quality, trustworthy enterprise"
- Enterprise with safety award in production
- "China High-Tech enterprise "
- **ISO9001 and CE** certified
- Has more than 50 patents in China
