2. The Company cooperates with training institutions to conduct training with the best quality and is recognized by the international inspection agencies, with the aim of producing a workforce that is ready to do the job in professional.

## RESOURCES AND CAPABILITIES

### PT. PESAT SERVIS INDUSTRI RESOURCES

PSI inspection techniques are designed to bring the latest technologies to the world and increase safety on site. We additionally can offer Heat Treatment Services, QA/QC Inspectors, Coating and Welding Inspectors and even welding crews as required.

We can make use of our specialized NDT Data Base System which has been designed for traceability, quality, reporting etc. The Data Based System is designed for "On" and "Offshore" works for Pipe lay and installation projects, fabrication works etc. This Data system produces Technician requests, Final reports, breakdown of repairs by welder and other client-based reports. Most importantly the NDT Data System allows "Real Time" traceability of status of works performed which ensures the project runs smoothly and that QA/QC can be better utilized in field and project planning becomes much easier for management.

### PT. PESAT SERVIS INDUSTRI CAPABILITIES

- Highly experience Management
- Electronic NDT data system for reporting
- Experience and trained technicians PCN, CWIP & ASNT

Inspection activities on industry is the technical requirements to ensure the quality both in materials or on weld, inspection activities carried out at the time of fabrication or on facilities that are already operating.
