

PT. VACUUM PUMPS INDONESIA

COMPANY PROFILE

PT. VACUUM PUMPS INDONESIA

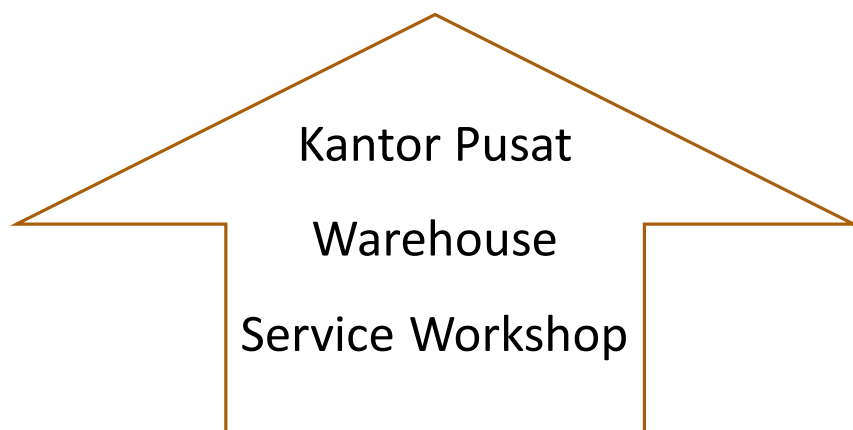

Ruko Cempaka Mas Blok C No. 25

Jl. Letjen Suprpto, Cempaka Putih

Jakarta Pusat 10640

Telp. : (021) 4288 7455 (Hunting)

Fax : (021) 4288 7457

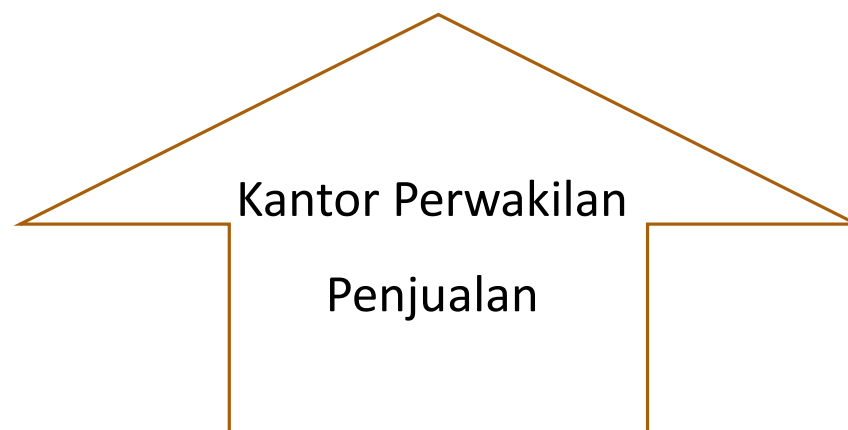

Kahuripan Nirwana Ruko Mora Soho No. 107

Jl. Raya Kahuripan, Sidoarjo

Jawa Timur 61252

Telp. : (031) 9970 4820

Fax : (031) 9971 0276

PT. VACUUM PUMPS INDONESIA

Berdiri sejak tahun 1994; dikenal dengan “INDOVAC”

Authorized Distributor dan pusat service Produk Gardner Denver di Indonesia

Keunggulan kami:

- ❖ Kualitas terbaik
- ❖ Harga bersaing
- ❖ Pengiriman tepat waktu
- ❖ After sales service terjamin

Gardner
Denver

Warehouse

Menjamin ketersediaan stock consumable parts (fast wearing spare parts)

Service Workshop & After Sales Support

- Teknisi terlatih dan berpengalaman
- Kontrak Pengadaan Spareparts
- Kontrak Maintenance Service
- Maintenance Training
- Repair & Overhaul

More than just Sales

Memberikan solusi komplit pengadaan centralisasi sistim vacuum, termasuk design, pengadaan produk, instalasi dan pemeliharaannya

Industri pengolahan Kertas

- Mesin: Elmo Rietschle VLR 500 & DLR 501
- Jenis: Vacuum Pump & Low Pressure Pump
- Quantity: 3 & 2 unit

More than just Sales (2)

5 Unit
VC 300

3 Unit
CLFEH 501

More than just Sales (3)

2 Unit
VLR 1000

2 Unit
VC 500

ELMO RIETSCHLE

- Vacuum & Low Pressure Pump asal Germany
- Pemimpin pasar Vacuum Pumps
- Flow sampai dengan 2,500 m³/h
- Pressure 2.2 bar(G)
- Vacuum 0.1 mbar(A)

WELCH

- Vacuum Pump asal USA
- Handal untuk aplikasi di laboratorium
- Flow sampai dengan 650 L/min
- Vacuum sampai dengan 1×10^{-4} Torr

CRVpro
Your Robust Vacuum Pump

Discover the evolution of two-stage rotary vane vacuum pumps. Built to last. Born to perform. And designed to simplify your work. Meet the robust vacuum pump series - CRVpro.

COOL RUNNING
Enhanced air flow allows the pump to run 10°C cooler than standard rotary vane pumps. The lower temperature leads to reduced chemical activity within the pump and slows down rates of oil consumption.

INTERNAL SURFACE PROTECTION
Inside surface of the oil case has a PTFE coating and the outer surface of the pumping module has a black oxide coating. Both coatings act to slow metal corrosion and, when coupled with foreline traps, extend service interval.

LARGE OIL CAPACITY
Chemical vapors that sublime from the foreline cold trap into the pump oil are more diluted due to the larger oil capacity. This minimizes the rates of oil breakdown and reduce chemical attacks within the pump.

ROBUSCHI

- Vacuum & Blower asal Italy
- Flow sampai dengan 25000 m³/h
- Pressure 1 bar(G)
- Vacuum 33 mbar(A)

GARDNER DENVER

- Compressor udara dengan performance terbaik
- Flow sampai dengan 2,800 m³/h
- Pressure 13 bar(G)
