PT GOLDEN PRATAMA GEMILANG

Since 1994, PT. Golden Pratama Gemilang has been providing second to none service to our customers. For over 25 years as a supplier of world renowned industrial machineries, we have lots of experience to deliver whatever it is that come to your needs.

Our main focus are to fulfill the requirements of Sugar, Cement, Fertilizer, Cigarette, Power, Oil & Gas, as well as other industries in Indonesia.

Providing excellent service has always been our motto since this company started. Satisfied customers will lead to a better company, that's why building and maintaining our credibility and trust is crucial to our company spirit.

VISION

To be the biggest & most trusted EPC company in Indonesia

MISSION

- Supporting the expansion of sugar industry, plantation, & energy in Indonesia through our product and services.
- Providing the best solution through our integrated one stop service for our clients.
- Providing the latest advancement of technology for our clients.

■ OUR PRODUCT

SHAFT MOUNTED PLANETARY DRIVES

PACKAGE SOLUTIONS :

- Foundation Free
- Pinion, Coupling & Toolbar Free
- Less Power Consumption
- No Misalignment
- Less (Modular) Inventory & Downtime
- Reduced Strees on Headstuck & Bearing

FOOT MOUNTED PLANETARY DRIVES

PACKAGE SOLUTIONS :

- Robust & Compact Design
- High Mechanical Efficiency
- Modular Composition & Flexible Ratio
- Easy Maintenance

■ OUR BENEFIT

Made In Italy

Adjustable Gear Speed (RPM)

PT GOLDEN PRATAMA GEMILANG

■ OTHER PRODUCT

2000 SERIES

Reliable and well established

The 2000 series of linear and bevel planetary gears offers excellent modularity and flexibility.

The multitude of ratio combinations and the output configurations for ten different gear sizes and five bevel stages, make this range perfect for all those circumstances where compactness, long life, ease of installation and quick delivery times are required.

PLUS SERIES

Innovative and great performance

This series has represented a technological revolution as far as planetary transmission is concerned and can be found in the 18 different sizes available, ranging from 25000Nm to 2400000Nm. This is the result of new studies that ensure maximum performance while still being very compact and with a truly incomparable price/performance ratio.

The Plus Series is suitable for all application sectors but more particular for the mining, marine and industrial sectors.

SLEWING GEARS

Reliable and well established

The planetary series dedicated to slewing applications boasts 13 different sizes with peak torque ranging between 1200 and 210000 Nm.

The reinforced output supports of this series and its compact dimensions offer reliability in applications with high radial loads. All sizes are available in the version with an integral pinion or a slide-on pinion, all can be accessorised with a wide range of components and negative brakes.

HELICAL GEARS

Quality made to measure

This line of helical and bevel-helical gears meets with outstandingly high quality standards, offering total customisation of each single unit.

Available on request, highly skilled resources are dedicated to making these gears, determining and perfecting the solution most indicated for each application.

■ OTHER PRODUCT

**REGGIANA
RIDUTTORI**
PLANETARY REDUCTION **GEARS**

W SERIES

Compact and flexible

The W range is designed to resist intense application cycles.

Our gear units are easy to maintain even when assembled in the drum, as all the interfaces are on the motor side.

A guaranteed long life time and resistance to high torque peaks are just a couple of the many features of our W range. Our winch drives can be equipped with brakes and custom made accessories to ensure a perfect and simple assembly on your system.

COMBINED GEAR UNITS

Essential Power

Combined gears have been designed to offer new compact solutions with a great performance for heavy-duty work cycles.

The solidity of the planetary technology and the high power capacity of the helical gear geometries ensure the force necessary for heavy industry applications. The keys of success of this range are the total customisation and the service of our qualified technicians that optimise the efficiency and scheduling of plant commissioning.

WHEEL GEARS

Strong and compact

18 different sizes that guarantee compactness, resistance to high loads, axial and radial load capacity and with a wide choice of ratios, designed for hydraulic and electric drives. Our wheel gears are made with alloyed steel to guarantee maximum performance combined with high resistance to impact and to radial and axial stresses.

BRAKES

That extra safety

Our range of negative lamellar brakes is the winning accessory when an emergency brake is needed for plant safety reasons.

Available in a modular configuration for mounting on reduction gears or in a direct configuration on orbital motors or, on request, a version with a backstop device is also available.
