Brands

What We Can Do For You

Frame Production

Supplying custom made frames for any type of industrial requirements.

Fabrication

We provide belts tailored custom to your needs. You need it, we make it according to your requirements.

On site joining

To keep your downtime minimum and ease maintenance procedure, SBI provides on-site joining service.

Our Services

Sarana Belt offers you supplementary services to give you the best experience and accommodate for your varied requirements.

Slitting Flat belt & Conveyor

Cuts a large roll of material into narrower rolls, accommodating the needs of machines with smaller conveyor

Hot Air Welding

Hot air welding machine optimized for PE ,PP, PVC , PVDF material.

Heating Press Conveyor, PTFE

Portable splice press, available for on site joining. Optimizing fast splicing technology, heating and cooling under 13 minutes.

Finger Puncher Machine

Designed to punch fingers on the end of lightweight thermoplastic conveyor belt. Available to work onsite as well as on workshop.

High Frequency Welding

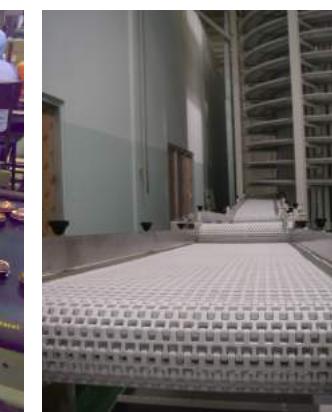

HF Welding machine is applicable to PVC/PU industrial belt plate, conveyor belt, running belt, etc.

Conveyor Splitting Machine

Separator is used to separate between the plies of a conveyor belt. Cutting is often required in preparation before splicing a belt with a splice press.
