Our Customers

Line Matrix Printer

For more than 40 years, Printronix has been addressing global customer needs in the supply chain space by providing enterprise grade industrial printing solutions. Featuring robust energy-saving line matrix printers, our products streamline operations reduce costs and help organizations sharpen their competitive edge.

The Printronix S809 is a reliable, industry-leading 24-pin printer, performance-built to be the toughest, fastest and quietest in its class.

The Enclosed Pedestal comes equipped with all the built-in quality, reliability, and performance of the top-of-the-line Printronix Cabinet Printer, but in a smaller and more compact footprint.

The Printronix P8000ZT/P8000HZT offerings are specialized cartridge line matrix printers designed for businesses using multi-part and serialized documents that require print on demand, single wasted forms and reduce operating costs.

The P8000/P8000H Cartridge series delivers the most flexible design, adaptable functionality and manageable savings of any line matrix printer. The Open Pedestal models combine a small rolling footprint with ease of forms.

The P8000/P8000H Enclosed Cabinet is the preferred choice for print environments where acoustic need to be kept to a minimum.

Combines the simplicity of PDF & PostScript printing, with the dependability, capability, and low cost ownership only line matrix technology can deliver.

Barcode Scanner

A barcode reader (or barcode scanner) is an electronic device that can read and output printed barcode to a computer. Like a flatbed scanner, it consists of light source, a lens and a light sensor translating optical impulses into electrical ones.

Barcode Printer

A barcode printer is a printer designed to produce barcode labels which can be attached to other objects. Barcode printers use either direct thermal or thermal transfer techniques to apply ink to labels.

Thermal transfer printers use link ribbons to apply the barcode directly into the label while thermal transfer printers use heat to blacken the barcode onto the label.

A point of sales system encompasses the hardware, software, and support that manage that transaction, including credit card processing, and the post-transaction operations that lead to customer fulfillment, whether in retail or restaurant setting.

Point Of Sale

RFID Solution

Radio-frequency identification (RFID) uses electromagnetic fields to automatically identify and track tags attached to objects. The tags contain electronically-stored information. Passive tags collect energy from nearby RFID reader's interrogating radio waves. Active tags have a local power source (such as a battery) and may operate hundreds of meters from the RFID reader.

CCTV & Access Point

Protecting lives, building and assets in our aim. The product portfolio includes video surveillance, intrusion detection, fire detection and voice evacuation systems as well as access control and management systems. We will protect your company with our security and safety system.

Thermal Camera

Effective with no direct contact, check quickly, remote checking, large monitoring area, detection of many people.

Asset Management System

Our success story

FASTrack is a software application solution for managing and tracking fixed and mobile assets. It is flexible and can be easily integrated into any Financial system, Procurement system or Enterprise planning solution for immediate up to date access to business information

Smart Stocktaking with Smartphone

Forget pen and paper or expensive barcode scanners. Count inventory with your smartphone/tablet. Use the same technology as the professional terminals for the price of a pencil and paper.

Built-in 1D/2D Barcode Reader

Enter data manually or use your phone as a barcode scanner. Count inventory and fixed assets in a simple, fast and reliable way. All required tools are already in your pocket.

Export & Import Data from Excel

If you already use some software to manage, it's a good idea to export the data from it. Most systems allow you to export inventory data or count sheets to an L or S file. If you don't have our inventory data in a system yet, our application will make it very easy to register everything.

Human Resources Information System

HUMANIS reduce the HR Departments contributions to the steadily growing pile of paper by allowing employees to complete and store form online.

Boost Productivity

Helps you recruit, hire and train new employees as quickly as possible so that they can effectively fill their new roles. With better initial on boarding and continual training, you can boost employee productivity, reduce turn over and achieve greater efficiency.

Improve Oversight

Proactively monitor compliance with routine company policy while requiring their personal attention. The system will also generate reports to demonstrate compliance, identify irregularities and pin point problems that need manager intervention.

Ensure Greater Compliance

Help you file and retrieve documents more efficiently you can streamline the compliance process as well. Many platforms can also connect with insurance carriers and file legal documents within the system, keeping all your data in a single place.
