

GENERAL PRODUCT ***ELPACK***

Packaging Solutions
Dosing Unit & Inspection Solutions
Compelete End-Of-Line Solutions
Customized Solutions

Packaging solutions

Vertical-Form-Fill-Seal, Flow Wrapper, Doy Pouch, Filler and Capper, Multyline Sachet series

Vertical-Form-Fill-Seal series

Vertical-Form-Fill-Seal is packaging machine pillow bag type, suitable for all kinds of products. System motion Continous or Intermittent.

Flow Wrapper series

Flow Wrapper is packaging machine for center seal bag type, suitable for wafer, soap, noodle, tissue, biscuit, etc.

Doy Pouch series

Doy Pouch is packaging machine specifically packed for doy pouch type, suitable for all kinds of products.

Filler and Capper series

Filler and Capper, machine filling-capping for bottle, jerry can. Application product suitable for Liquid, pasta, powder products.

Multyline Sachet series

Multyline Vertical is packaging machine pack format packing 4 side seal, application suitable for liquid, granule, powder products.

Horizontal Multyline Sachet 4SS series

Multyline horizontal is packaging machine packed type 4 side seal, application suitable for : teeth brush, stick candy,

Packaging solutions

Cartoner series

Cartoning machine solutions for different industries integration into your production line, stable performance and easy to operated. function.

Our cartoning machine can be devided into 2 types; horizontal cartoning machine and vertical cartoning machine. Motion system 2 types ; Continous motion and Intermittent motion. System Closed ends flaps ; Tucking or applying glue.

Dosing unit & Inspection solutions

Multyweigher, Auger & Checkweigher, Metal Detector

Multyweigher

Multyweigher, weighing system , accuracy \pm 2% suitable for all kinds of products.

Auger

Auger volumetric dosing system , accuracy \pm 1% suitable specially for powder, granule products.

Checkweigher

Checkweigher inspection system for weight, suitable for all kinds of products.

Metal Detector

Metaldetector inspection system for detect metal in product, suitable for all kinds of products.

Compete End Of Line solutions

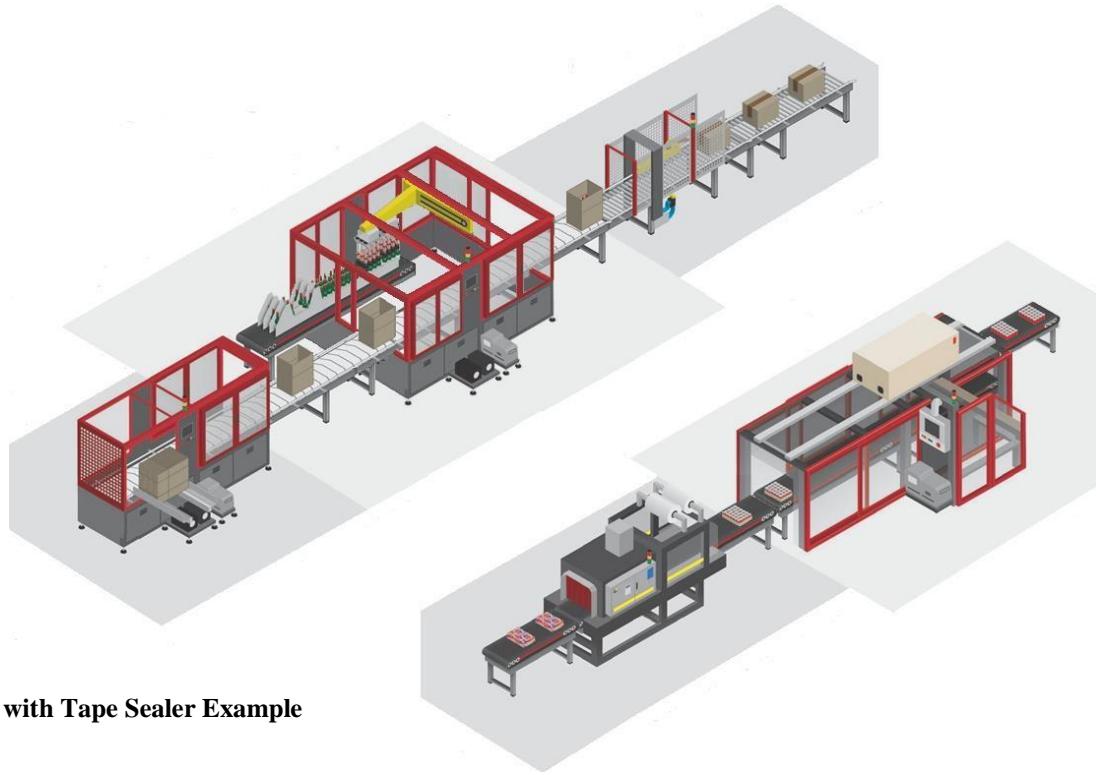

Case Erector, Case Packer, Case Sealer, Shrink Wrapper

We design End Of line custom solutions for integration into your production line, ranging from packing to cardboard cases, whatever the format of the product.

New generation of robotic case packer, equipped with servomotors to ensure smooth motion and maximum positional accuracy.

Version available with 2 axis robot or articulated arm robot according to the needs of each clients. The new pick up heads have sufficient flexibility to enable packing into cardboard cases

Our case packer support combination with sealer tape or shrink wrapper machine to cover all of customer possible needs

Case Packer with Tape Sealer Example

Case Packer with Shrink Wrapp Example

Competelete End Of Line solutions

Paletizing Robot System

Articulated-arm palletising robot systems, specially designed to costumer specific applications.

These machines offer significant advantages in terms of radius of operation and useful working area. Easy layer edition from the screen

Its 4 and 6-axis models for different applications, and its speeds, make this palletiser a good end-of-line option to consider, both for its versatility and the undoubted appeal of its articulated movements.

Robot Paletizer Lay Out Example

Costumized solutions

Case Elevator, Conveying system, Shuttle Car, Counting system, Feeding system, etc

ELPACK can be suplied packaging equipment, costumized solution design and manufactured to specification : Case Elevator, Conveying system, Shuttle Car, Counting system, Feeding system, etc.

Case Elevator (or Lowerator)

Coztumized Conveying System
