TRUCK TIRE CHANGING STAND 36015 T115

*Soporte para cambio de
llantas de camiones
Support de démontage
pour pneus de camions*

Weight: 1 lbs (9.5 kg)

Stand handles wheels or open rims 16.5" to 24". Double-slide adjustment with locking device prevents twisting so it stays aligned with the wheel or rim. Stand is the ideal height for driving off beads or demounting tires. It must be used to be appreciated.

TIRE BEAD SEATERS

*Calzador para llantas
Cordons de talon de pneus*

One-piece rubber tube for mounting hard-to-seat radial, bias-belted, or conventional truck tires. As tire is inflated, the lubricated bead seater forms a seal between the rim and tire, allowing the air pressure to force the beads into the rim flange. As proper pressure is reached, the bead seater slides out and over the rim. Use bead lubricant with bead seaters.

WOOD HANDLED WEDGE

Con mango de madera / Manche en bois

Increased contact area between the handle and the hammer head causes the handle to have a tighter fit when the head is seated on the handle. By increasing end-taper of the handle the hammer head cannot come off the end of the handle. No slits in the top of the handle minimizes the effect of Humidity/Climate (expansion & contraction) on the handle.

Tutup Pentil Antiribet, Isi Angin Tak Perlu Lagi Cabut Tutup Pentilnya

Andhika Arthawijaya • Kamis, 3 Desember 2020 13:00 WIB

Tutup pentil untuk isi angin ban tak perlu cabut tutup pentil lagi

Otomotifnet.com – Pernah mengalami ban mobil kesayangan sering kurang angin, padahal ketika dicek tidak ada kebocoran pada ban?

Nah, coba deh cek pentil bannya, bisa jadi angin yang ada dalam ban keluar dari bagian itu.

Yup, kebocoran angin pada ban bisa lewat pentil ban, "Apalagi bila pentil ban sering dibiarkan terbuka tanpa ada tutup pentilnya," ujar Didi Tanusa, General Sales Manager TedMore, pembuat tutup pentil antiribet.

Pasalnya, Lanjut Didi, bila pentil dibiarkan tanpa tutup, akan rentan kemasukan debu atau kotoran, serta air.

"Debu atau kotoran ini bisa menyumbat atau mengganjal inti dari pentil **ban** (*valve core*), sehingga berisiko menyebabkan kebocoran angin," jelasnya.

Tak hanya itu kata Didi, jika sering memasukkan air, "Jarum pentil yang terbuat dari logam, bisa mengalami korosi dan bisa patah layaknya gigi."

Jadi, lanjutnya, jangan sepelekan fungsi dari **tutup pentil** tersebut.

Sebab, sering kali pemilik kendaraan ketika habis menambah tekanan angin pada **ban**, suka kelupaan memasang kembali tutup pentilnya.

Tutup pentil TedMore, terdapat double valve untuk mencegah kebocoran

Pemilik kendaraan bisa langsung colok *aja* slang pengisian anginnya seperti biasa pada **tutup pentil** TedMore yang sudah terpasang.

"**Tutup pentil** ini juga punya dual protection. Jadi kalau valve core bocor, ada pengaman di bagian atas **tutup pentil** yang mencegah udara keluar dari **ban**," kata Didi sembari kasih tahu banderol satu buah **tutup pentil** TedMore ini cuma Rp 25 ribu.

"**Tutup pentil** TedMore ini sudah bisa didapatkan di online store, dan untuk di Jakarta ada di beberapa titik SPBU Shell (Pluit, Jl. Industries dan Jl. S Parman), serta di beberapa gerai **ban** macam di Saputra **Ban** Jl. KH. Hasyim Ashari No.9 Jakarta Pusat," tutup Didi.

Wiihh.. keren juga nih!
