

Reliable performance is defined by exceptional engineering.

MBS's expertise, technical skills, network and smart solutions lay the foundation for a solid reputation

MBS has been consistently working from designing to manufacturing and repairing of marine related technical engineering products. The spirit of "solving problem through engineering" from the founding is alive through the development of in-house high-quality custom-made products and our repair service capability. Together with our experienced human resources we will take on the challenge of becoming the No. 1 technical engineering of high-performance marine parts.

We will continue to do it.

ABOUT US

VISION AND MISSION

OUR VISION

To become a leading company in the field of Marine Transportation Service and Manufacturing both locally, nationally and internationally. Become a partner who always responds to consumer needs quickly, accurately and efficiently.

OUR MISSION

- Providing service and services of the highest quality to every customer as a form of our commitment and integrity.
- Consistently and continuously improving human resources, facilities, and best services.
- One Stop Machining Solution, all of our products and services are produced in house.

WHO WE ARE

CV Mapan Berjaya Sejahtera (MBS) was established in 2006, this company is a company founded on the passion of its founders who came from professionals in the engineering field, to meet the needs of the Marine Transportation Industry.

MBS services include repair services supported by the best technology, as well as professional consulting.

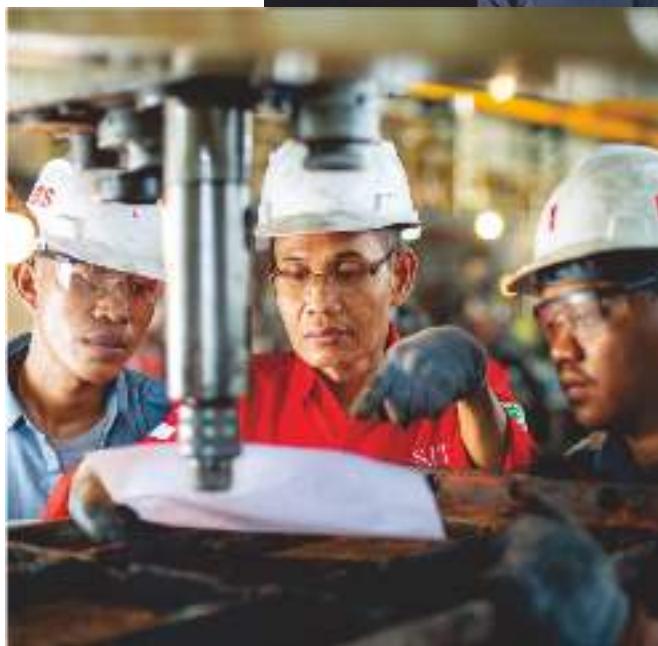

To maintain an existence in this industry and gain market trust, MBS is committed to continuously developing and continuously investing in new technology with the latest methods from time to time. Over time, MBS was able to expand more widely in the manufacturing sector, namely expanding its ability to support component needs that are not limited to the Marine transportation industry, but to

various industries such as automotive, sheet metal, heavy industry, food and beverage, mold and dies, etc. . Our commitment pays off and enables us to manufacture specific spare-part components either in general or custom, with a very high level of complexity and precision.

Armed with proven capabilities, long experience, mastery of the latest technological facilities, MBS is a reliable partner for your various projects.

COMPETITIVE _____ ADVANTAGES

Our People

MBS consists of competent, experienced and committed people, this is a very valuable asset for our company. The whole series of production and service processes are handled by individuals with various equally important roles in one company, where the products produced represent our company, so we pay great attention to skill development, selection process, and placement of workers according to their passions and talents.

Professional Management

Our professional management stems from a mature strategy sparked by long experience in manufacturing. Our management focuses on periodic quality checking in production operations, strict and continuous project development with various divisions such as the quality control division, carpentry division, sales division, support division, to the financial division. MBS prioritizes customer satisfaction by understanding needs from all sides, not just the best product, but on time and at competitive prices. Our hope is to become a reliable partner to assist customer development.

Strategic Location

MBS is located on Surimulia warehouse at Magromulyo Industri complex, Surabaya - East Java. This area is very strategic, busy, and acted as a link between Surabaya and Gresik, supported by toll access and large main roads with the capacity to accommodate even the largest vehicle on road. This area is strategic for both MBS and its customers to get fast and easy-to-reach services. All operations of the MBS production process are carried out in-house under one roof at this strategic location, including machining, heating, painting, balancing, welding, turning, cutting, grinding, sandblasting.

M OUR MARKET

MBS has partners in various engineering fields with very diverse backgrounds, so we always adapt the qualifications and standardization of services according to the needs of each customer in these various fields. Here are some of the MBS customers we serve from time to time.

SERVICE & SPECIALITIES

INTRODUCTION TO OUR CAPABILITIES

MBS, which is now recognised as the marine repair workshop, was not born immediately. After decades of experience in the engineering and manufacturing industry, we are now continuing to take on technological challenges to broaden our services without ever giving up. Here are to bring better image of what we can do for you.

ENGINEERING

PLANNING & PROCESS

MBS can help clients to focus on project planning, to address how to complete each project in a certain timeframe, with defined stages and designated resources to set measurable objectives, identifying deliverables, scheduling and planning tasks.

EXPERT CONSULTING ON GENERAL CONSTRUCTION, MARINE INDUSTRY, HYDRAULIC, TURBO CHARGER

MBS understands the ins and outs of general construction, marine industry, hydraulic systems and turbo mechanisms. Customers can come and discuss together to find the best solution for designing effective and efficient machining systems according to their operational uses.

MANUFACTURING

MACHINING

- 3+1 axis CNC Machining Center
- 3 Axis CNC Machining Center
- CNC Turning
- Precision Cylindrical Grinding
- Conventional Turning, Milling, Slotting, Grinding, and Large Turning.

WELDING

- Thermal Spray Weld
- MIG MAG
- Argon GTAW
- Asetelin Welding
- SMAW Weld

HEAT TREATMENT

- Oven process
- Hardness testing facility

SHEET METAL

- 3000W 4 Axis CNC Fiber Laser
- NC Bending
- Painting
- Optic Laser Marking

SANDBLASTING

- Sandmaster Sandblasting Machine

CERTIFICATIONS

KNOW
OUR
QUALITY

MBS, which has now become Indonesia's flagship workshop for marine service related, was not born immediately. After constant learning and repeating workloads of many shape of services, and through the production and development of various prototypes, we have finally mature and confident to everyone. "Never give up until a good product is made", this is our attitude and pride in manufacturing since its founding. The spirit of never giving up and continuing to take on challenges, along with the skilled techniques, has been handed down, accumulated, and lives on in the field. Our products developed in this way are still supporting customers in various places today.

Accelerating innovation in engineering

LET US HELP YOU

We will be ready with sincere responses to all kinds of leads. We will naturally expand the scope of our work to suit your needs. We have gained the support of many companies and expanded our business. This attitude, which has become the cornerstone of our growth, lives on in each and every employee as our belief.

We are your partner who values teamwork, and who has a strong will to accomplish what has been decided. We believe that putting your trust in us will benefit your company.

Sincerely,
Michael

Marine Technical Engineering Service Specialist
