Loctite is an American brand of adhesives, sealants, surface treatments, and other industrial chemicals that include acrylic, anaerobic, cyanoacrylate, epoxy, hot melt, silicone, urethane, and UV/light curing technologies. Loctite products are sold globally and are used in a variety of industrial and hobbyist applications.

Loctite is the trusted choice for high-performance adhesive, sealant and coating solutions for manufacturing segments across the globe. LOCTITE® products are used in objects that touch lives every day from aircrafts to furniture.

Since its beginning in 1935 the value-oriented family business Kärcher has developed into a worldwide brand offering its customers three strong attributes: top performance, innovation and quality. Kärcher products have won more than 100 national and international prizes for exemplary design. In addition, more than 1,300 patents and utility models are evidence of the company's inventive spirit and passion for innovation. Today, Kärcher is the leading global provider of efficient, resource-saving cleaning systems, characterized by reliable, user-friendly products, and strong service.

More than 60 years ago, Devcon introduced Plastic Steel, a hardened steel coated epoxy putty, as an alternative to welding and brazing. Today, ITW Polymers Adhesives North America has one of the most comprehensive maintenance and repair product offerings in the world.

All of these products can be easily applied by plant maintenance workers with minimal training.

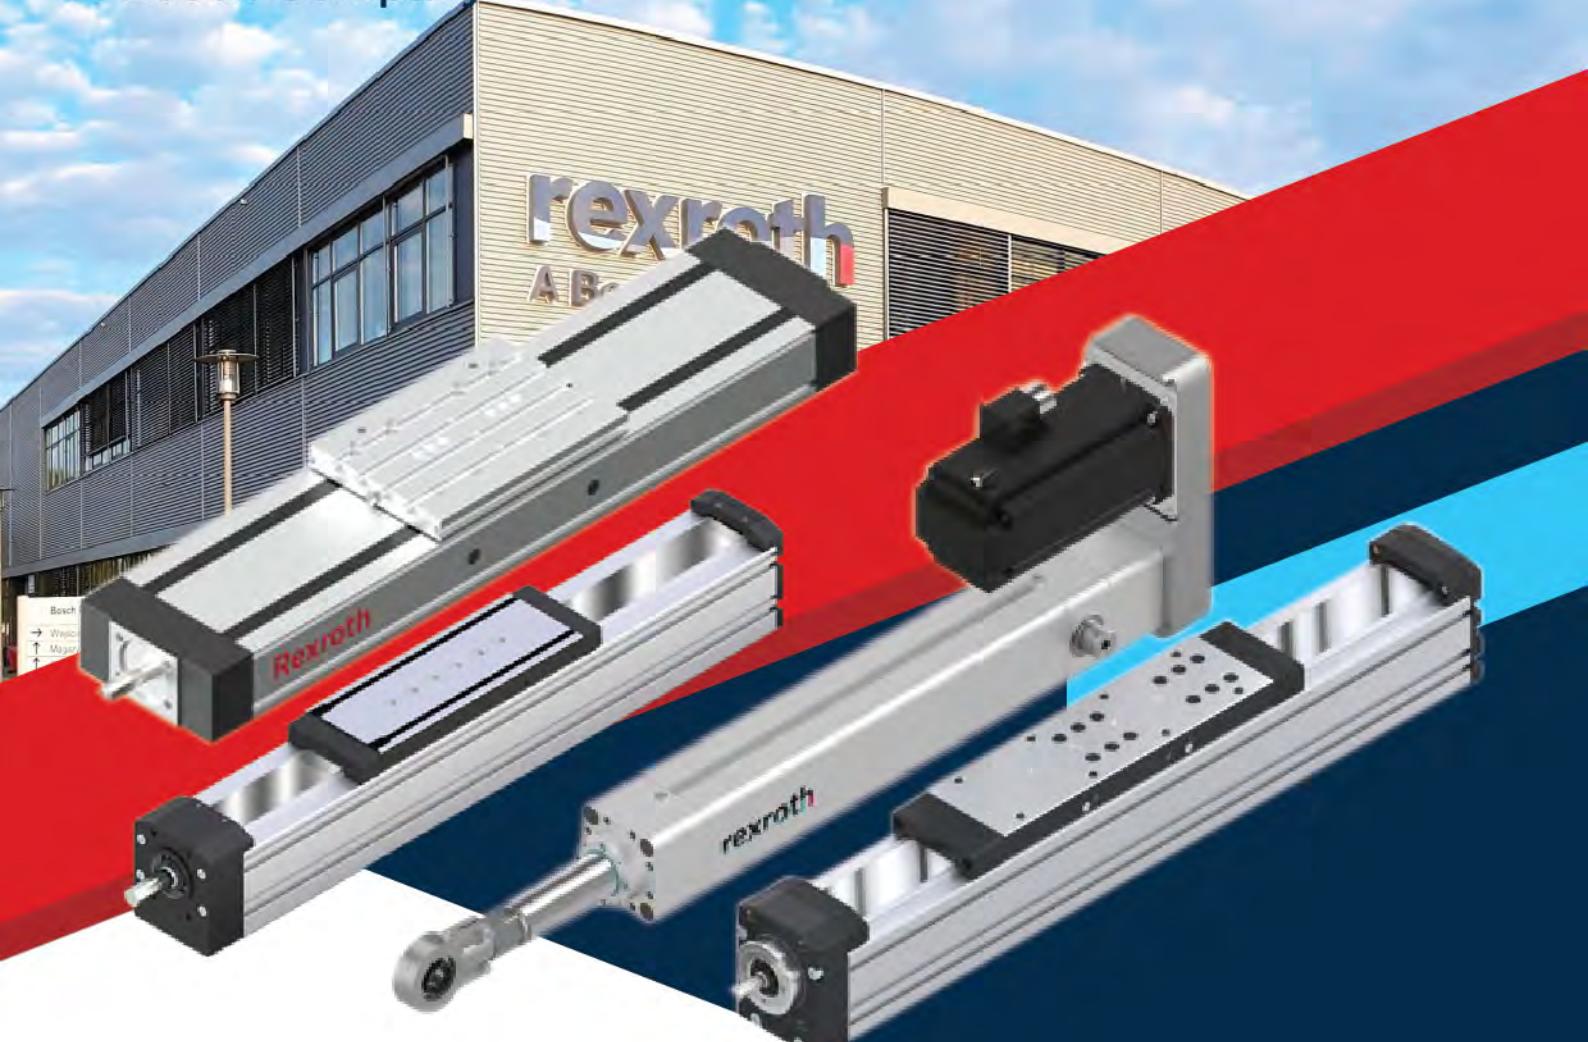

BOSCH

The Bosch Group is a leading global supplier of technology and services. The Bosch Group comprises Robert Bosch GmbH and its more than 350 subsidiaries and regional companies in more than 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries.

This worldwide development, manufacturing and sales network is the foundation for further growth. With all its products and services, Bosch enhances the quality of life by providing solutions that are both innovative and beneficial. Bosch celebrated its 125th anniversary in 2011.

Bosch Rexroth driving the digital transformation of the Factory of the Future, pushing boundaries with Connected Hydraulics and setting the foundation for Mobile Machinery Transformation. All products and solutions contribute to the development of more sustainable machines, manufacturing and everyday life.

The origins of the long history of Bosch Rexroth influenced by constant movement. It all started with a water-powered hammer mill, followed by an iron foundry in Lohr am Main. Bosch Rexroth's unique industrial expertise has become synonymous with custom-designed solutions.

Our business includes power transmission & distribution systems and equipment, industrial components & equipment systems, infrastructure systems, IT systems and products, data center service and medical diagnostic imaging systems. We also specialize in the marketing of automotive systems.

• Global Standard

Conformity to JIS C 4213(Japan)
[Efficiency class: IEC60034-30
Premium efficiency class (IE3)]

• Operational cost saving

Considering the operational cost under long term period, the best idea is to adopt the high efficiency motors

• Furthermore benefit

Low noise and vibration can be realized with advanced technologies

• High efficiency

- Compare to the standard motors, iron core shape is improved and material quality is raised
- Motor loss is reduced 30~40%
- This improvement realizes higher efficiency when compared with the standard motors

• Long Motor Life

- The temperature of stator coil has been decreased at 10~20°C under a rationalization design and a high cooling effect for an electric part
- The coil insulation is achieved two times longer on operation life compared with the standard motor
- The bearings are also 2.5 times longer on operation life

• Inverter operation is also available

0.4~1.5kW 4P is available to operate with 1:10(6~60Hz) speed under 100% constant torque operation using the inverters (In case the sensorless vector inverters are used) 1: 20(3~60Hz) is also available with special design motors.

Chemours is a different kind of chemistry company, driven by our purpose to create a better world through the power of our chemistry. With a world-class portfolio, we provide solutions for industries ranging from automotive, paints, and laminates to advanced electronics, construction, energy, and telecommunications, helping to make a world that is more colorful, capable, and cleaner.

Chemours' chemistry is a vital part of our everyday lives, enabling virtually everything people touch including many products we use every single day. From smart phones to other advanced electronics, high speed communications and connected devices via the Internet of Things, to more climate friendly refrigerants in our homes and cars—chemistry is at work.

And increasingly, we are enabling technologies and innovations that are more environmentally friendly including electric vehicles, clean energy such as hydrogen, coatings that create durable and advanced infrastructure, and more energy-efficient cooling. The world needs our chemistry so we are hard at work bringing solutions that are better, safer, more reliable and sustainable thanks to our chemistry.

Today, CRC is a global supplier of chemical specialty products, manufacturing over 1,300 items and developing specialized formulas to meet the unique needs of the Automotive, Marine, Heavy Duty, Hardware, Electrical, Industrial and Aviation markets. CRC serves customers around the world with manufacturing and distribution throughout Europe, Central and South America and Asia-Pacific marketing areas. CRC operates 26 facilities that produce more than 70 million cans of aerosol products each year.

COMMITTED TO QUALITY

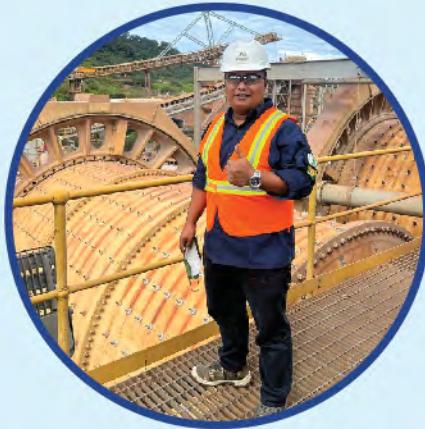

"CRC is proud to be ISO (International Organization for Standardization) certified since 1996. The benefit of achieving and maintaining ISO 9001:2008 certification reach our customer through the consistent conformity of our product and service, assuring superior quality, environmental responsibility, safety and reliability. The Result: products you can depend on' from a company who has earned your trust."

COMPANY PROJECTS

PT. AGINCOURT RESOURCES

PT Agincourt Resources (PTAR) is a prominent mining company in Indonesia, specialising in the exploration and mining of precious metals such as gold and silver. The Company's primary operating site is the Martabe Gold Mine in the Indonesian province of North Sumatra, while our headquarters in Jakarta facilitates and manages the corporate functions of the Company.

DEVCON wearguard Highload Application In Section Mill Gold Mine

PT. SCG SEMEN JAWA

SCG was established in 1913 following a royal decree of His Majesty King Rama VI to produce cement, the main building material for infrastructure projects that greatly contributed to the progress of the country during that period. Since its founding, SCG has grown continually and diversified into three core businesses, namely Cement-Building Materials Business, Chemicals Business and Packaging Business.
