Sanko FR3-[ ]L

The packaging machine which packages more than one small bag in large bag.

The fall impact to which a small bag gives it to a large bag is eased because the cylinder in which a small bag is inserted in the large bag inclines.

The quantity every product kind can be established by controller in the front easily.

All Fill also named auger fillers machine, is a filling machine for all types dry powder & granules product. The biggest advantage of auger filling machine is that the filling systems are relatively closed. It makes the auger filler machine the ideal choice for filling all fine powders, such as talc's, flour, spice powder, ground coffee, pepper powder, chemical powder, and baking soda.

Operation is very easy with a semi / automatic system.
